Experience

Software Engineer Intern	**HBO**	**Summer 2018**

- Implemented Kubernetes Horizontal Pod Autoscaling on custom metrics for 2019 Game of Thrones Premier
- Architected a web adapter to receive HPA controller requests and extract Statsd metrics from GraphiteDB
- Developed HTTP endpoints to emit Prometheus scrapable histogram metrics for 5 HBO micro-services

Software Engineer Intern	**Microsoft**	**Winter 2018**

- Developed and architected a HoloLens application via Unity and Azure for visualizing 3D cancer tumour data
- Designed a game object that enabled users to filter through 50,000 cell models via keyboard and gesture controls
- Implemented a WebGL app to inject keyboard inputs into the HoloLens app while syncing the apps' states

Cognos Analyst Intern	**IBM**	**Winter - Summer 2017**

- Solved 150+ client submitted tickets via issue reproduction, software log tracing, and trouble-shooting on phone
- Fully repaired 2-3 malfunctioning server environments daily, achieved multiple perfect client evaluations
- Identified, documented, and tested 30+ defects within IBM Cognos; fixed in future iterations of software

Software Engineer	**Lamify**	**Summer 2016 - Winter 2017**

- Implemented landing pages and web applications via Bootstrap and Node.js for company clients
- Developed frontend component in anti-procrastination Chrome extension, which helped boost user base by 25%
- Performed regression tests and ensured cross-platform functionality for web applications

Software Developer Intern	**Canada Post**	**Summer 2016**

- Architected an Excel VBA macro that generates fuel usage anomaly reports for 13,000+ Canada Post vehicles
- Reduced process runtime by 95% and parsed 12,000+ fuel usage entries in under 12 minutes
- Developed an automatic email routine with Outlook VBA that sends location specific reports to site managers

Web Developer Intern	**ReEnvision Digital Marketing**	**Summer 2016**

- Designed and implemented tailored marketing websites for agency clients via WordPress and HTML/CSS
- Implemented SEO via Google Analytics and resolved 200+ visual issues for various client sites
- Created a custom marriage license request form for an Ottawa Member of Parliament's public site

Technologies

- **Languages:** Python, C#, Go, Java, JavaScript, Swift, Visual Basic
- **Framework/Libraries:** HTML/CSS, Bootstrap, jQuery, Android, iOS, Node.js, React Native
- **Environment and Tools:** UNIX/Linux, Git, Azure, Google Cloud, AWS, Unity, Kubernetes, Docker

Education

Honors Bachelor of Science	**University of Toronto**	**Fall 2015 - Summer 2020**

- Major: Computer Science - Software Engineering Specialist w/ co-op

Highlighted Projects

- **omegaLOL:** Built a Python Twitch chat parser that creates stream clips on high chat activity moments
- **shARe:** Integrated AWS DynamoDB for iOS AR app that enabled users to place text bubbles in their surroundings
- **Air VR:** Developed Node.js air traffic tower simulation using Google Cloud voice to text ML model

Awards

- **Riot Games Hackathon: Visualization Tool - Honorable Mention (2018):** Second place for data visualization tool
- **Facebook Coding Challenge (2018)**: 5th place out of 50+ in Facebook's HackerRank coding challenge at UofT
- **Best use of Amazon Web Services (2017):** Independently developed AWS architecture at Hack Western IV
- **Best Google Chrome Extension (2016)**: Implemented application frontend with Bootstrap at McHacks
